

Senior Design Engineer
FlowTech
Durham
£40,000 - £55,000

You will be responsible for preparing, executing and overseeing all Project related design/specification/procurement activities required for the execution of material/equipment supply and/or service/installation contracts, ensuring that all Client and Company expectations are managed and met from inception to completion.

Key responsibilities:

- Responsible for entire detail design, specification and preparation of all engineering deliverables, for equipment supply and/or service projects.
- Liaise with the Client and ensure that all project engineering deliverables required under the terms of the Contract are supplied accordingly.
- Interpret, negotiate and implement agreed specification requirements, clearly communicating such needs to suppliers and fellow project team members.
- Ensure that Project Engineering Milestones are achieved and reported accordingly, focused on design/specification, procurement and installation/commissioning stages, as appropriate.
- Assist with the preparation, collation and submission of all Project Engineering Documentation, Drawings, Designs and/or Calculations required under the terms of the Contract.
- Support the sales/order acquisition process, including preparation of quotation engineering details and liaising with Clients, as required.
- Attend Client sites, where necessary, in order to conduct site surveys, design reviews, installation/commissioning progress monitoring/reporting, trouble shooting and project completion/handover activities.
- Strong project engineering change control management, ensuring profitability and payment for everything we do/provide.

Essential

- HNC Level Engineering Knowledge.
- Proficient in Autocad/Inventor software, or equivalent.
- Good Leadership, Communication and Interpersonal Skills.
- High level of attention to detail.
- Tenacious, confident, determined and positive attitude.
- Self-Starter and Team Player.
- Commercial awareness.
- Customer focused, whilst protecting/delivering business goals and objectives.
